BIO

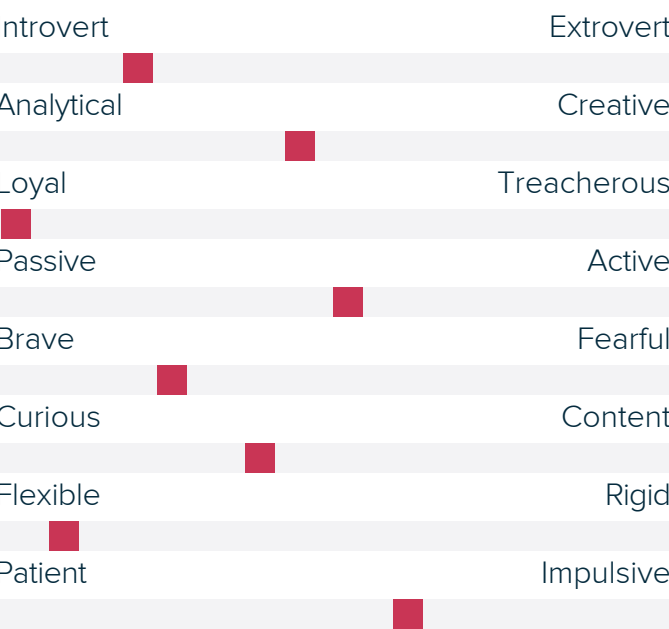

Backstory

Virgil is surrounded by other men. He doesn't feel like the life he's currently living is the one he was meant for. His father is physically and emotionally abusive, blaming Virgil for his mother's disability (which resulted from complications during birth). His girlfriend Angela is his only female role model.

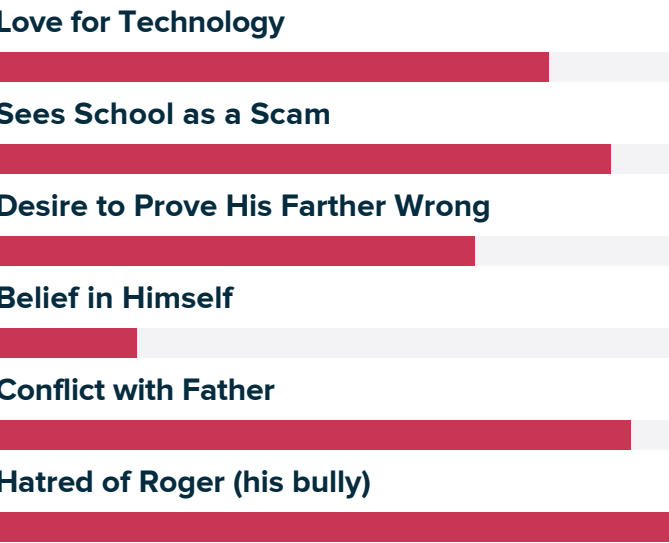

Frontstory

Virgil regularly skips school to work at the IT Career Academy, where his boss Tom provides the love and support Virgil lacks at home. When his father finds out that Virgil is also doing drugs, he sends him to a wilderness school in Utah for troubled kids, which reshapes his whole life.
